

**Canton High School ChemClub** had our annual trip over to Cherry Brook Primary School on Thursday, March 31<sup>st</sup> to work with students from every grade to explore science. Students in grades Kindergarten to third grade had an opportunity to explore the science that naturally surrounds them during their recess time.

ChemClub brought wind tubes, cars, solar beads, rockets, bubbles, kites, nature paper, and other amazing demonstrations for the students to explore outside.

It was a great day! The high school students had a great time and enjoyed working with the elementary students!
