NOTICE TO PARENTS/GUARDIANS, FACULTY AND STAFF

A formal asbestos management program is in place for Canton Public Schools. The purpose of this program is to manage the asbestos-containing building materials (ACBM) in our school and to take steps to make sure that these materials do not present an exposure hazard to the students, faculty, or staff.

The Asbestos Management Program is implemented through AHERA. An Asbestos Management Plan has been developed for Canton Public Schools following an asbestos inspection by Eagle Environmental, Inc.

This Management Plan identifies the locations of the identified and assured ACBM in our school buildings and details our ongoing Asbestos Management Program. The plan also includes descriptions of previous asbestos inspections, poland for ongoing surveillance, and plans for repair or removal of damaged ACBM.

A copy of the Districts asbestos Management Plan is maintained in the Custodial Office at the campus of Canton High School. The Plan is available for review during normal school business hours.

Sincerely,

Superintendent of Buildings & Grounds
Tom Richardson
